EDUCATION

Bachelor of Information Technology (Systems)

North West University
2024 – 2026 (Final Year)

TECHNICAL SKILLS

Languages

Java · Python · C++ · C# · Delphi

Web

HTML · CSS · JavaScript

Tools

Git · Visual Studio · BlueJ · IDLE

Database

MySQL

SOFT SKILLS

- Problem-solving
- Teamwork
- Communication
- Mentoring & tutoring

PROFESSIONAL SUMMARY

I am a detail-oriented final-year IT student at North-West University with strong skills in programming, problem-solving, software development and a deep foundation in software engineering, object-oriented programming, and full-stack development. I demonstrated the ability to apply academic knowledge in practical settings through project work and academic tutoring roles. I am enthusiastically seeking an opportunity to contribute my technical expertise and continue growing within a professional IT environment.

WORK EXPERIENCE

Student Assistant – CMPG 211 (Java) | 2026 | North-West University

- Assist students during lectures and practical sessions
- Mark assignments and provide constructive written feedback
- Conduct Student Instructor (SI) sessions in the lecturer's absence
- Provide academic support to enhance student understanding and performance

Student Assistant – CMPG 121 (C++) | 2025 | North-West University

- Supported students during lectures and practical sessions
- Assisted with marking of assignments and assessments
- Conducted Student Instructor (SI) classes when required
- Provided in-class academic guidance to first-year students

IT Tutor (Part-Time) | Ongoing | Three Rivers Learning Academy

- Tutored high school IT students in programming and problem-solving
- Prepared students for tests and examinations
- Guided students through debugging techniques and core IT concepts

PROJECTS

Blue River Zoo Management System

A comprehensive zoo staff and animal management system developed as a collaborative project.

Mobile Vet System

A mobile application designed to manage veterinary field operations, records, and client interactions.

Enterprise Network Infrastructure Design

Designed and documented an enterprise-grade network topology with security and scalability considerations.

KEY ACADEMIC MODULES

Data Structures & Algorithms

Java Programming

Databases

Computer Networking

Mobile App Development

Web Development

Information Security
